

810 Series
Laminated Bookcases

"Solid Construction, Premium Features"

Bookcases Styled to Last

Construction

Laminate Bookcases are built to withstand the heaviest loads without sagging or warping while maintaining the form and style of Corilam's exact specifications.

Sides Construction

Bookcase sides are 3/4" with matching color thermofused melamine on interior and exterior. Exposed edges are banded with impact resistant 3mm PVC edging. Bookcase sides are bored with 1/4" holes on 1-1/4" spacing to allow for shelf adjustability.

Bottoms

Bookcase bottom is sled type perimeter banded with high impact resistant, 3mm PVC to protect bookcase bottom from moisture absorption.

Shelves

Shelves are durable under the heaviest of loads and constructed of 1" thermofused melamine, laminated two sides to 45 lb. industrial grade particleboard. Exposed edges are banded with 3mm, PVC. Shelf pins are thermoplastic, clear pins with double tip inserts set to fit bored case sides. Weight tolerance of pin is 300 lbs. Shelves cannot be pulled from bookcase. Shelves are designed to prevent warp or deflection under heavy loads.

Top and Toekick

Top is 3/4" thermofused melamine banded with 3mm rigid, PVC. Toekick is 3/4" thermofused melamine 4" high, recessed 1/2" from bookcase front.

Back

Back is 3/4" solid thermofused melamine in matching color for finished appearance.

Assembly

All bookcase units are shipped assembled.

Premium Features

- 1" thick shelves
- Sled-type base
- Solid 3/4' back
- Impact resistant PVC on all exposed edges
- Wide color selection
