

Study Carrels

Student privacy for work, study, or computing.

Construction

Frame

Constructed of 1" x 1", 16 gauge square tubular steel. Frame uprights include adjustable leg levelers at each contact with the floor. (Casters are optional.)

Frame uprights are finished with a durable finish of electrostatically applied epoxy powdercoat that is highly scratch resistant.

Back and Side Panels

Panels are 3/4", 45 lb. thermofused melamine. Panels are joined to frames with fully concealed fasteners.

Worksurface and Top Shelf

The worksurface and top shelf are constructed of 1", 45# industrial grade particleboard surfaced with high pressure laminate. A balancing sheet is applied to underside of top and shelf. Shelf and worksurface front edge options include traditional roll edge, comfort edge and 3mm PVC.

Adder Carrels

Adder Carrels share one side panel and legs with adjoining carrel.

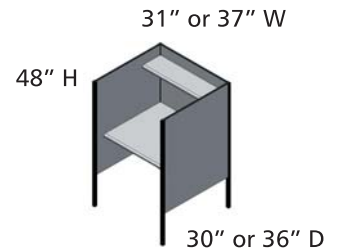

Standard Study Carrel Options
