

Steel Frame Technology Workstation

"Tables That Take The Punishment"

Tech Labs Offer Unique Design, Flexibility and Durability

Panels and Support Posts

Back panels are constructed of 3/4" thermofused melamine board and exposed edges are banded 3MM PVC. Support posts are black powder coated 1", 16 gauge steel tubing with welded panel-mounting brackets. Features adjustable leveling foot.

Work Surfaces and End Panel

Work surfaces are constructed of one piece seamless, high pressure laminated, 1" thick 45 lb. particle board core top. All inside and outside corners rounded and banded 3MM PVC. Grommets are 3" round. Work surface end panel is 1" thick thermofused melamine board. Exposed edge banded 3MM PVC. Features adjustable leveling feet.

Hardware

Under counter work surface brackets are black, powder coated, 1/8" steel exceeding 1,200 lb. load limit. Tamper resistant through bolts for attaching back panel to support post.
